# ABOUT

## WE EMPOWER THE CURRENT

Current Power Company is a leading international supplier of high-quality EV charger solutions for individuals and businesses in the Kingdom of Saudi Arabia and the Gulf Region.

We are committed to leading the Net-Zero emissions race by improving the EV infrastructure and offering complete solutions for EV charging.

Our goal is to fulfill Saudi Arabia's Vision 2030 by promoting sustainable transportation and reducing carbon emissions.

## OUR VISION

To be one of the leading companies contributing to Saudi Arabia's Net-Zero emissions, by offering clean energy solutions.

## OUR MISSION

To be one of the best one-stop shops in Saudi Arabia by providing full EV charging solutions for individuals and businesses.

# Our Success Partners

## SUCCESS STORIES

We are proud to partner with a global network of leading companies and institutions that are committed to reducing emissions and creating a Net-Zero emissions future. These partners offer a diverse range of electric power solutions that are helping to reduce emissions and create a cleaner, healthier future for all.

# CURRENT POWER SERVICES

We are a one-stop shop committed to providing exceptional customer service and support throughout the entire process, from consultation and planning to installation and maintenance.

- **Charging solutions, product design and development** : Expert consultations and planning for EV charging solutions.
- **SUPPLY**: Providing high-quality EV chargers and accessories for individuals and businesses.
- **CONTRACTING**: Establishing the infrastructure for EV chargers.Charging solutions, product design and development.
- **CABELING**: Establishing electrical cables and circuit breakers for EV chargers.
- **INSTALLATION**: Installing EV chargers with precision, care, and high quality.
- **OPERATION**: Charge point operators (CPO) for EV chargers using state-of-the-art Charge Point Managment System (CPMS) and mobile apps.
- **MAINTAINCE**: Providing after-sales services and emergency maintenance.

# COMING SOON

# AC Home and Office Charging Solutions

## AC Home and Office Charging Solutions

### Teltonika Energy – EVC 2

- Up to 22 kW AC charging power for fast and efficient charging.
- Smart connectivity via Wi-Fi, Ethernet, Bluetooth, and 4G LTE.
- Easy charger management and monitoring through a dedicated mobile application.
- NFC authentication for secure and convenient user access.
- Compatible with Type 2 charging standards used by most electric vehicles.
- Solar energy integration for smarter and more sustainable charging.
- Dynamic load balancing to optimize power consumption and protect electrical infrastructure.
- Built-in energy metering with high measurement accuracy.
- IP56 weather protection and IK10 impact resistance for indoor and outdoor installations.
- Available with customizable front plates in Anthracite Grey, Burgundy Red, Kebony® Wood, Granite Brown, and Winter White.

## AC Home and Office Charging Solutions

### Alfanar, AlfaCharge Smart

- Smart AC charger with 3.7kW to 22kW power options
- Type 2 cable with RFID, App, and Plug & Charge start modes
- Multi-connectivity: WiFi, Ethernet, Bluetooth, 4G (OCPP 1.6J)
- High safety: 30mA Type A + 6mA DC, IP65, IK10 protection
- PV-ready with adjustable current for efficient solar use

## AC Home and Office Charging Solutions

### Wallbox, Pulsar Max

- The officially approved charger for Lucid for Saudi Arabia.
- Up to 22 kW. Lucid Air Grand Touring fills its 112 kWh battery in less than 6 hours.
- Compact, smaller than a toaster and lighter than a laptop.
- Easy to use and install.
- Compatible with most electric vehicles.
- Schedule charging sessions and take advantage of off-peak energy rates.

AC Home and Office Charging Solutions

## Volt Charge, Basic

- 22 kW 7kW AC charging
- Type 2 connector with sleek, compact design
- Mobile App connectivity
- 4G, WiFi, Bluetooth communication
- IP65 protection & °60C operation

CURRENT POWER  
قوة التيار

## AC Home and Office Charging Solutions

### Schneider Electric, EVlink Smart Wallbox

- Up to 22 kW. Lucid Air Grand Touring fills its 112 kWh battery in less than 6 hours.
- Easy to use and install.
- Compatible with most electric vehicles.
- Energy management.
- Green Premium label, best-in-class environmental performance.

## AC Home and Office Charging Solutions

### CITA Smart 7 ECO & CITA Smart 22 ECO

- Smart AC charging solution designed for homes and workplaces
- Available in two power options: 7kW and 22kW to suit different needs
- Type 2 charging cable (5 meters), compatible with all EVs
- Multiple access modes: RFID and mobile app control
- Multi-connectivity: WiFi, Ethernet, 4G with OCPP 1.6J support
- Durable design with IP65 weatherproof and IK10 impact resistance
- Smart energy management with dynamic load balancing
- PV-ready with Modbus integration for solar systems
- Built-in 4G router and MID-certified energy meter
- High safety with PME fault detection and advanced protection systems
- Wall-mounted or pole-mounted installation
- Certified: ADQCC, SASO, UKCA, CE

## AC Home and Office Charging Solutions

### Voltie EV Charger

- Smart EV charging solution designed for reliable and efficient daily charging
- Faster charging performance with improved energy efficiency and stable operation
- Equipped with advanced protection systems for safer charging under different conditions
- Supports multiple charging modes including scheduled charging and battery-saving operation
- Full remote monitoring and charging control through a dedicated mobile application
- Compatible with solar energy systems for cleaner and more sustainable charging
- Smart energy management for optimized power consumption and charging efficiency
- Durable design suitable for residential, commercial, and workplace installations

# AC Commercial Charging Solutions

## AC Commercial Charging Solutions

### Teltonika Energy – EVC 2

- Up to 22 kW AC charging power for commercial and semi-public charging environments.
- OCPP 1.6 compatibility for seamless integration with charging management platforms.
- Advanced connectivity through Ethernet, Wi-Fi, Bluetooth, NFC, and 4G LTE.
- Remote monitoring and management capabilities for efficient charger operation.
- Dynamic and multi-device load balancing for optimized power distribution across multiple chargers.
- Solar energy compatibility to support sustainable charging infrastructure.
- Built-in energy metering with accuracy deviation below %1.
- Enhanced electrical protection including ground fault detection and DC residual current protection.
- IP56 weather resistance and IK10 impact protection for demanding outdoor environments.
- Supports a wide range of mounting accessories and scalable charging deployments.

## AC Commercial Charging Solutions

### Wallbox, Pulsar Pro

- Up to 22 kW. Lucid Air Grand Touring fills its 112 kWh battery in less than 6 hours
- Easy to use and install.
- Compatible with most electric vehicles.
- Power consumption control.
- EV charging scheduling and monitoring.
- Smart EV charging features app.
- Available in five faces: Red, Gray, Wood, White, and Brown.

## AC Commercial Charging Solutions

### Schneider Electric, EVlink Parking

- Up to 22 kW. Lucid Air Grand Touring fills its 112 kWh battery in less than 6 hours
- 2 Charging points at the same unit
- Metal enclosure
- Compatible with most electric vehicles.
- Enables businesses to diversify their revenue stream
- Automated load management and balancing

## AC Commercial Charging Solutions

### CITA Dual 44 kW GEN 3 & CITA Dual EcoPillar

- High-performance AC charging solution designed for commercial and public use
- Dual charging capability to serve two vehicles simultaneously
- Power options up to 44kW for fast and efficient charging
- Type 2 connectors compatible with all EVs
- Multiple access modes: RFID, mobile app, and backend platform
- Multi-connectivity: WiFi, Ethernet, 4G with OCPP support
- Smart energy management with dynamic load balancing
- Ideal for high-traffic locations (parking lots, malls, offices, fleets)
- Durable outdoor design suitable for continuous commercial operation
- Pedestal-mounted solution for standalone installations
- Advanced safety systems with integrated protection features
- Certified to international standards (CE, UKCA, SASO, ADQCC)

# DC Ultra Fast Charging Solutions

## DC ULTRA FAST CHARGING SOLUTIONS

### Alpitronic, HYC 1000

- Ultra-fast DC output delivering up to 1000 kW total power.
- Supports simultaneous charging for up to 8 EVs.
- Wide operating voltage 150 up to 1000 V DC for all EV categories.
- High efficiency  $\geq 97.5\%$  with SiC-based power modules.
- Modular architecture enabling flexible site layout and smart power allocation.

## DC ULTRA FAST CHARGING SOLUTIONS

### Alpitronic, HYC 400

- Ultra-High Power Charging: up to 400 kW
- Scalable All-in-One design to meet current and future needs
- Simultaneous charging: up to 3 vehicles
- Wide voltage range: 1000 – 150 VDC
- High efficiency: up to %97.5

## DC ULTRA FAST CHARGING SOLUTIONS

### Alpitronic, HYC 200

- DC fast charging up to 200 kW with simultaneous charging for two vehicles
- Scalable, future-ready design starting from 100 kW and expandable as demand grows
- High efficiency up to %97.5 to reduce energy loss and operating costs
- Dynamic load management for stable performance in high-traffic locations

## DC ULTRA FAST CHARGING SOLUTIONS

### Wallbox, Supernova 2

- Up to 220 kW. Lucid Air Grand Touring fills its 112 kWh battery in less than 25 minutes.
- Simultaneous charging up to 2 EVs
- Payment via screen QR Code or credit card reader.
- Easy installation and maintenance
- Built-in smart charging
- LED guiding lights and charging indicator
- 10" Anti-vandal Color Touch Display
- Auto-retractable cables

## DC ULTRA FAST CHARGING SOLUTIONS

### Alfa Charge DC Fast Charger – Premium

- DC fast charging starting from 60 kW up to 400 kW
- Modular design allowing future power upgrades
- Dual connectors supporting CCS2
- High-efficiency power system built for continuous operation
- Ideal for commercial hubs, public charging, and fleet stations

## DC ULTRA FAST CHARGING SOLUTIONS

### Volt Charge, 60 kW DC Fast Charger – Premium

- 60 kW fast DC charging output
- CCS2 connector options
- High-efficiency power module for stable performance
- Dual-language interface with 7" display (model-dependent)
- Ideal for commercial sites, parking areas, and fleet charging

## DC ULTRA FAST CHARGING SOLUTIONS

### Volt Charge, 120 to 180 kW DC Charger – Premium

- 180–120 kW ultra-fast DC charging
- Dual-gun system for two EVs simultaneously
- Dynamic power allocation for maximum efficiency
- Wide voltage range compatible with modern EVs
- Built for highways, malls, and heavy-traffic sites

## DC ULTRA FAST CHARGING SOLUTIONS

### CITA Smart DC 30 kW, DC Eco (160–80 kW), DC Pro (480–240 kW)

- Ultra-fast DC charging solutions designed for commercial and highway use
- Wide power range from 30kW up to 480kW to cover different deployment needs
- Suitable for public stations, fleets, highways, and high-demand locations
- Smart charging with advanced system control and monitoring
- Multi-connectivity with backend integration (OCPP supported)
- Multiple access modes via app and RFID for flexible operation
- High-efficiency charging to reduce vehicle downtime
- Scalable solution for small, medium, and large charging infrastructures
- Robust design for continuous operation in demanding environments
- Supports simultaneous or high-speed charging depending on configuration
- Certified to international standards (CE, UKCA, SASO, ADQCC)

# Current Power Products

## Current Power Products

### Salmani EV Charger Protective Enclosure

- Protective enclosure designed to safeguard EV charging stations.
- Provides reliable protection against weather, impact, and everyday wear.
- Built for long-lasting durability and outdoor performance.
- Seamlessly combines protection, functionality, and premium aesthetics.
- Suitable for residential, commercial, and public installations.
- 100% designed and manufactured in Saudi Arabia.
- Supporting the future of sustainable electric mobility.

## SOME OF OUR VALUED CLIENTS

We are confident that by working together, we can achieve Net-Zero emissions and create a cleaner, healthier future for all.

# CUSTOMER TESTIMONIALS

CURRENT POWER is the best! They helped me choose and install the perfect EV charger for my home. I also appreciate their maintenance services, which gives me peace of mind knowing that my charger is always in good working order. I highly recommend CURRENT POWER to anyone looking for an EV charger installation company.

MR. OSAMA ALANSARI

★★★★★

ممتاز جداً! لقد ساعدني في اختيار وتركيب شاحن للسيارة الكهربائية المناسب لبيتي. كما أنني أشكرهم على خدمات الصيانة التي توفرها، مما يعطيني طمأنينة في معرفة أن شحني يعمل دائماً بشكل مثالي. أوصي بشدة CURRENT POWER لأي شخص يبحث عن شركة لتركيب شاحن للسيارة الكهربائية.

## شكر وتقدير

السادة / مؤسسة قوة التيار لشواحن المركبات  
تهديكم إدارة الموردين في بنك التنمية الاجتماعية أطيب تحياتها،

انطلاقاً من إيمان إدارة الموردين في بنك التنمية الاجتماعية في أهمية تعزيز العلاقات الوثيقة والفاعلة مع الموردين وبالإشارة إلى مشروع أعمال تحسينات بيئة العمل وتحقيق معايير الاستدامة – شحن السيارات الكهربائية بمنطقة b-1 ونظراً لما لمسناه من تميز في تنفيذكم للمشروع وحرص على نقل المعرفة للفريق، إضافة إلى جهودكم المبذولة في سرعة تشغيل الشاحن من خلال توفير فريق مختص سعودي لفحص الشاحن الخارجي واعداد التقارير اللازمة لذلك.. الأمر الذي سيساهم في الإعلان عن جهازته قريباً.

عليه نود ان نتقدم لكم باسمنا بجزيل الشكر والعرفان على ما قدمتموه من اعمال مميزة ونتمنى مزيداً من التعاونات المثمرة معكم مستقبلاً.

هذا وتقبلوا فائق التحية والتقدير،

الإدارة التنفيذية للمشتريات والعقود
